

Motor Lead Extension Guards

HULK MLE GUARDS - Created and designed to protect MLEs in high DLS and deviated wells. Our Guards are ideal for protecting the MLE on ESPs deployed in unconventional wells.

BENEFITS

- Significantly improved door design capable of carrying 10,000 lbs., safely allowing installations into the Horizontal.
- Axial Profile designed for smooth installation while still being rated for 10,000 lb. loadings
 - Bias Bolts as backups for Impacts and loadings in excess of 10,000 lbs.
- Forces Equipment string at least .75" away from casing- increasing MLE clearance
- Substantial resistance to rotation with a backup anti rotation bolt
- Built for multiple installations- quick refurbishment
- Bed accommodates MLE cable thermal expansion

FEATURES

- 316L Stainless Steel - Passivated
- 316L SS bolts or Upgrade to Titanium for toughest conditions.
- Anti-rotation Mechanism with backup
- Bias Bolts to prevent Axial Shifts
- Heavy duty door for maximum cable protection
- Concealed Beds for #4, #5 and #6 MLE
- (two) 1/4, 3/8 and 1/2 cap-tubes channels
